^a SW = seasonal wetland, sal-alk = saline-alkali sink.

^b textures of soils: si = silt or silty, c = clay or clayey, l = loam, s = sand or sandy, st = stony, gl = gravel.

^c WHC = Water holding capacity, in inches per volume of soil.

^d Prime Farmland = as defined by the California Department of Conservation.

^e LCC = land capability classification system of rating agricultural soils, I (high) to VIII (low).

^f n = neutral pH; mod alk = moderately alkaline; str alk = strongly alkaline; sl acid = slightly acidic; med acid = medium acidic; and st acid = strongly acidic.
